1/4-20 Internally Threaded Stud (In Enclosure)

Ground Wire (Not Included)

Use 1/4-20 Pan Head Phillips Screw (Item 3) to attach the subpanel with the associated internally threaded studs. The number of included screws will be dependent on the size of the enclosure.
*Holes with no stud behind are used for grounding purposes and do not require support.

Grounding hardware is included in the bolt pack. Use separately purchased ground wire and/or external tooth lock washer to fulfill grounding requirements for your enclosure.

 *Door to body bonding wire & fasteners are **NOT** included
